Dear Mr Goulden

Please find attached our July and August invoices together with the latest statement. The July and August meter readings can be viewed on [www.goongumpas.com](http://www.goongumpas.com)

At tomorrow's meeting we need to discuss

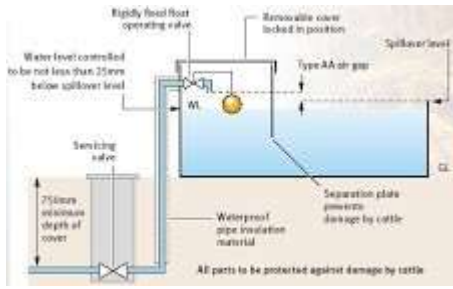

1. Why SWW have not paid our invoices.
2. Our expenses incurred between January and September.
3. Compensation for the eight years we have had polluted water because of non regulation cattle troughs connected to our supply.
4. Compensation for the eight years that SWW employees (including A.Symonds / A.Brand and K.Bray) failed to inspect these troughs despite being asked to on several occasions.
5. An explanation as to why there are still non regulation troughs (that could pollute our supply) in the area despite SWW stating they have inspected recently.
6. Clarification as to who monitors the Tailings End meter from now on.

We attach a diagram of a legal cattle trough and again request that SWW make sure that all local troughs comply particularly as to back flow protection and depth of pipe underground.

Regards

JH Layte
